## Configure Relationship the

Logically connect two related tables so data can be linked, referenced, and accessed easily supporting better data structure, consistency, and reporting.

1. Go to All >> In the filter search for Relationships >> Open Relationships.
2. In that, open Daily Expenses Relationship.

The screenshot shows the ServiceNow 'Relationships' page. The 'Name' filter is set to 'daily expenses'. The table lists various system relationships with columns for Name, Advanced, Apply to, Applies to table, Queries from table, Insert callback, Query from, Query with, and Updated. The 'Apply to' column is highlighted, and the 'daily expenses' relationship is selected.

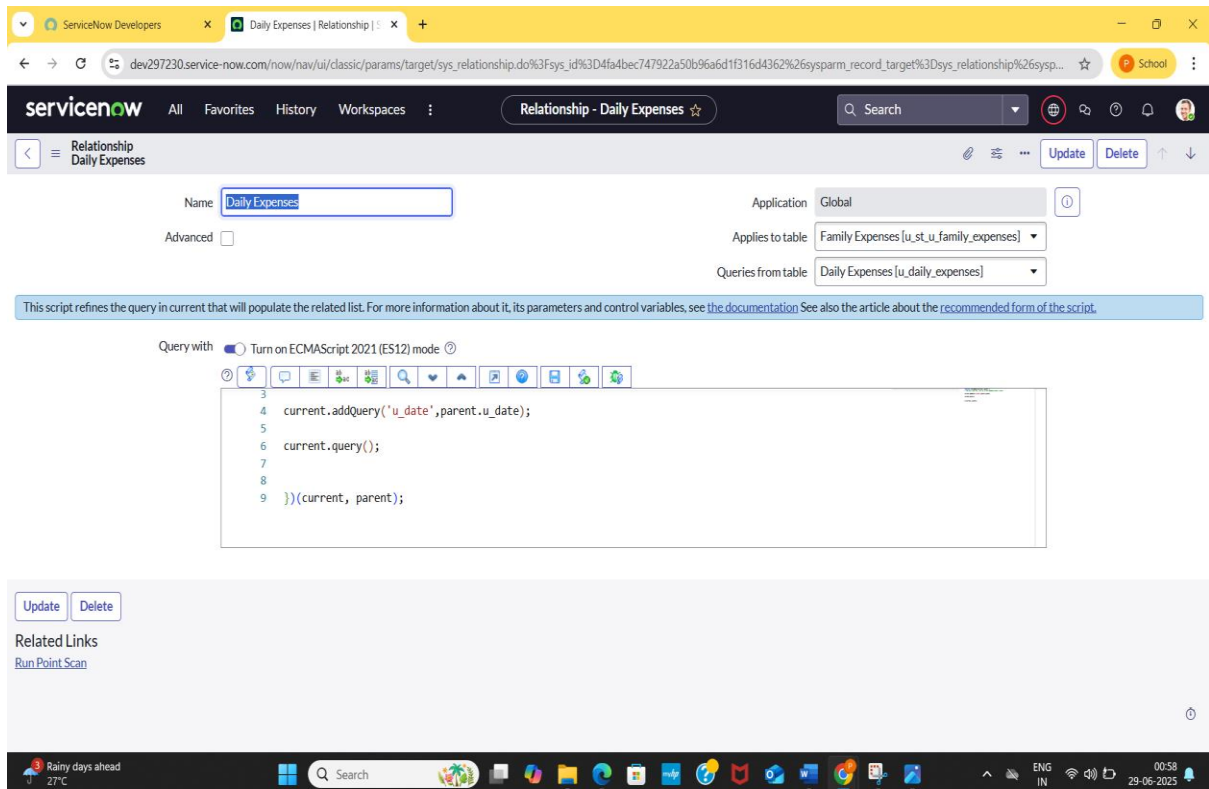

Name	Advanced	Apply to	Applies to table	Queries from table	Insert callback	Query from	Query with	Updated

3. For Applies to table : Select Family Expenses.
4. In Query with : write the below Query.

```
function refineQuery(current, parent) {
```

```
// Add your code here, such as current.addQuery(field, value);
current.addQuery('u_date',parent.u_date);
current.query();

})(current, parent);
```
